

Heal Smarter, Recover Faster

with RheeGen®

Experience the Power of Advanced Regenerative Therapy at Home

RheeGen's Transdermal Regenerative Cream delivers bioactive biomolecules derived from ethically sourced human stem cells to target damaged cells, assist with pain management, and accelerate recovery. No injections, no downtime—just powerful, targeted healing in a convenient, noninvasive topical application.

- **90% More Cost-Effective** than Traditional Treatments
- **Easy to Use** at Home
- **Penetrates All 3 Layers of Skin** for Maximum Results

Dr. Tommy Rhee
RheeGen President

How it Works: Bioactive Biomolecules

RheeGen introduces Growth Factors, Exosomes, Cytokines and Telomerase to damaged cells, signaling cell regeneration.

Contains a proprietary formula of known transdermal ingredients to ensure transdermal delivery. The FDA-complaint bioactive biomolecule formula derived from human mesenchymal stem cells (MSCs) is encapsulated in lipid nanoparticles to offer an extended shelf life.

“RheeGen is a savior!”

Travis B

I was a candidate for knee replacement surgery last year, but I was skeptical and didn't want surgery. I couldn't afford the \$10,000 for Stem Cell Injections, so I found this product, and used RheeGen for 1 year, and now I am back to running and working out with my legs. I feel little to no pain and feeling more stable in my knee. This stuff is great!
